TAKE A DEEPER LOOK.

New network threats emerge every day, and they're extremely elusive. It's time for a deeper level of protection: SonicWALL® network security solutions. SonicWALL solutions are built on a deep packet inspection architecture that can examine every packet of data before it enters a network. When deployed with the SonicWALL Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention Service, viruses, Trojans, spyware, phishing attacks, and other emerging threats are stopped dead. Unlike stateful inspection, SonicWALL solutions inspect 100% of network traffic. And because they're tuned to handle deep inspection at high speed, they provide exceptional levels of network performance at load conditions. Want to learn about deep protection products and services that don't sacrifice performance? Go to www.sonicwall.com/magnify or call 1.888.557.6642 for more details.
